

# IIT HYDERABAD

Inventing & Innovating in Technology for Humanity (IITH)

## Tech for Humanity

*Featuring IITH's High-End Research Facilities powering world-class Inventions*

# IIT<sup>Hyderabad</sup> 2026

భారతీయ సాంకేతిక విజ్ఞాన సంస్థ హైదరాబాద్  
भारतीय प्रौद्योगिकी संस्थान हैदराबाद  
Indian Institute of Technology Hyderabad

**A Year of Vision & Impact...**

IITH, in collaboration with Simpliforge Creations, has delivered two national firsts, India's first on-site 3D-printed protective structure in Leh with Lt Col Arun Krishnan & India's first 3D-printed pedestrian bridge, conceptualized and evaluated by Prof K V L Subramaniam & his research group.

“

*From a bunker in Leh to landmark bridges, IITH is redefining what India can build...*

”

## Greetings from the Director

Dear Friends,

As we step into the New Year, we celebrate a renewed opportunity to strengthen our academic community, foster innovation, and advance our collective pursuit of excellence. The year ahead holds immense promise, and this calendar is a reflection of the vibrant journey that awaits us—filled with learning, collaboration, and meaningful achievements.

IITH continues its remarkable trajectory as one of India's premier institutions. Our steady rise in the National Institutional Ranking Framework (NIRF) over the past five years is a testament to the dedication, hard work, and passion of our faculty, students, and staff. Since our establishment in 2008, we have consistently ranked among the top engineering institutes in the country, reaffirming our commitment to academic rigour and transformative education.

Our progress is deeply rooted in the strength of our research ecosystem. With world-class facilities, interdisciplinary initiatives, and a strong focus on innovation, IITH has become a hub for cutting-edge research and impactful solutions. Our collaborations with industry, vibrant startup culture, and globally recognized research contributions further amplify our role as a leading center of knowledge and technological advancement.

As we welcome 2026, let us continue to push boundaries, embrace new challenges, and work together to elevate IITH to even greater heights. May this year inspire us to dream bigger, innovate fearlessly, and contribute meaningfully to society.

Wishing each one of you a joyful, successful, and fulfilling year ahead!

Prof B S Murty  
Director, IIT Hyderabad

*A Year of Vision & Impact...*

TiHAN at IITH has developed an autonomous campus shuttle, a driverless electric vehicle designed to operate within campus roads. Equipped with LiDAR, cameras, GPS, and AI-based navigation, it can detect obstacles, follow predefined routes, and ensure passenger safety with features like automatic braking.

“

*IITH's TiHAN is steering India into the driverless era, with its autonomous campus shuttle, driving around campus...*

”

Prof Kiran Kuchi of IIT Hyderabad, in collaboration with WiSig Networks, has developed an advanced System-on-Chip that enables reliable, low-power connectivity for the Internet of Things and next-generation satellite communication. The chip supports precise positioning through GNSS and India's NavIC system and can intelligently process sensor data in real time. Designed to be compact and energy-efficient, it helps extend battery life in connected devices, highlighting IITH's contribution to building indigenous, future-ready communication technologies for global use.

6G research led by Prof Kiran Kuchi in collaboration with WiSig Networks is working on 6G innovations built on WiSig's open and programmable future network architecture, focusing on energy-efficient, AI-ready radio access networks with intelligent massive MIMO, advanced waveforms for next-generation frequency bands, integrated sensing and communication for applications such as UAV detection, post-quantum security solutions, and the development of broadband modem System-on-Chip technologies for future wireless networks.

“

*With breakthroughs in 6G prototypes,  
IITH is shaping the future of India's telecom ecosystem...*

The CMOS Image Sensor Lab at IIT Hyderabad, led by Dr Kapil Jainwal, develops system-on-chip CMOS cameras for high-dynamic-range 2D vision, LiDAR-based 3D imaging, and event-based cameras for machine vision, targeting applications in surveillance, intrusion detection, autonomous navigation and landing of unmanned vehicles, visions for robotics and drones, and medical imaging.

India's defence and aerospace sectors have received a major boost with the development of a Large Area Additive Manufacturing (LAAM) system at the DRDO-Industry-Academia CoE, IITH. Built jointly by IITH, DRDL and industry partners, the system enables large-scale metal 3D printing for complex aerospace and defence components, strengthening India's advanced manufacturing capabilities.

“ IITH's LAAM system is advancing India's defence and aerospace capabilities through large-scale metal additive manufacturing... ”
