

BTech in Biotechnology & Bioinformatics

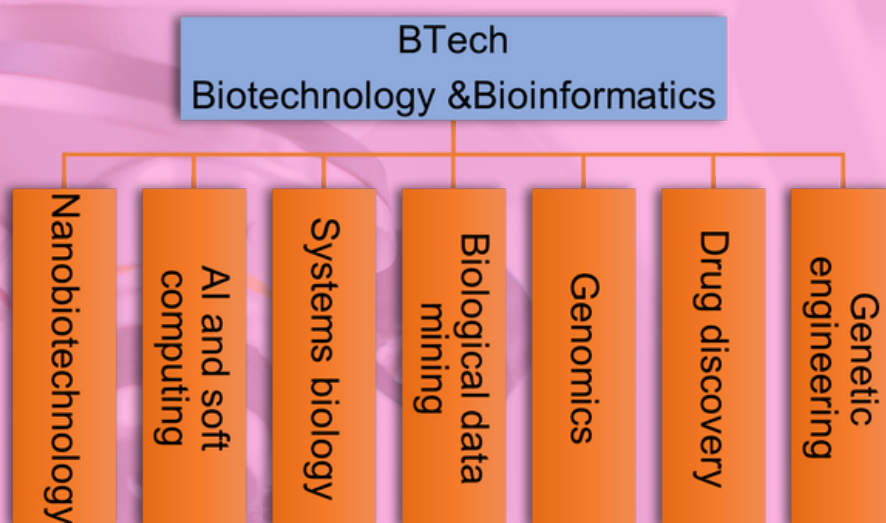

Overview

Biotech/pharma industries are growing at an unprecedented rate and keeping that in mind Biotechnology department at IIT Hyderabad offering a new 4-year B. Tech. program in Biotechnology and Bioinformatics. This B. Tech. program is an application-based program and aims to produce extraordinary and rare graduates with advanced skills in both biotechnology and bioinformatics. This program will offer unique learning and exposure to critical topics in biotechnology and bioinformatics. To further enhancement of job opportunities, this program has a semester-long industrial project which will help students to gain industrial experience.

Opportunities

Salient Features

- Industry oriented skills in biotechnology
- Learning of in-demand bioinformatics skills
- Semester-long industrial project to increase job opportunities
- Hands-on training sessions from the field experts
- Exposure to state-of-the-art facilities
- Advanced computational skills to solve real-life biological problems
